## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submissions filed on 3/5/08 have been entered.

### ***Information Disclosure Statement***

The Information Disclosure Statement (IDS) filed 10/18/07 has been considered by the Examiner in part. The reference JP 8-321312 was already considered by the examiner with the IDS filed 12/18/03 and considered on 2/9/07 as seen on Sheet 1 of 3. The reference JP 11-329496 which was previously crossed through with the IDS filed 10/18/07 and considered on 12/5/07 has now been considered by the Examiner. The IDS has been placed in the application file.

The Information Disclosure Statement (IDS) filed 3/5/08 has been considered by the Examiner. The IDS has been placed in the application file.

### ***Response to Arguments***

Applicant's arguments filed 3/5/07 are reiterative of the arguments filed 10/3/07 have been fully considered but they are still not persuasive. Applicants argue that the

Hamamoto reference does not disclose the claimed ranges but then admit that Hamamoto teaches ranges that overlap with the instantly claimed invention and that actually have a same exact end point. Therefore applicants contradict themselves. Because Hamamoto completely overlaps the instantly claimed ranges and shares a same exact end point there is sufficient specificity disclosed in Hamamoto for anticipation and applicants' arguments are not persuasive. Applicants also allege that their claimed ranges exhibit unexpected results, however it is quite clear from Hamamoto in paragraph [0026] that 0.5% of the vinyl Sulfone is used and in paragraph [0014] 0.1% is an endpoint of the range for vinyl Sulfone used. Both 0.5% and 0.1% are endpoints recited by applicants in the claims and therefore because Hamamoto discloses exact endpoints that applicants are claiming Hamamoto will exhibit the same supposed unexpected results that applicants allege. Therefore the rejections will be maintained.

***Claim Rejections - 35 USC § 102***

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-4, 8, 10, 11, 13, 15 and 17 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by the official translation of Patent Abstracts of Japan 11-329494 A.

See paragraphs 1, 5-18, and 26-32 of the official translation of the reference.

### ***Conclusion***

This is a Request for Continued Examination of applicant's earlier Application No. 10/718,478. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
